

Accredited IOSH Managing Safely

CNA provides IOSH Managing Safely Courses. The course provides training and instruction on applying management principles to Health and Safety in the workplace.

Who should attend?

Managers and supervisors in any sector, from any organisation who have to manage risk and resources.

Why they should attend?

Supervisors and line managers need to have a greater understanding of their Health and Safety duties than non-supervisory staff. They need to know how Health and Safety law applies to them and what their organisation's Health and Safety policy expects of them.

To be competent to manage Health and Safety issues "...sufficient training and experience or knowledge..." is required. (Management of Health and Safety at Work Regulations 1999, Reg 7(5)).

Successful candidates are awarded an **IOSH Managing Safely Certificate**.

Delivered live by our experienced and qualified trainers, in the same format as in a classroom course. Delegates participate in video discussions, text chat and group activities using virtual break out rooms. Delegates need a computer with a web-cam and internet connection. The course assessment includes a short end of course assessment as well as a risk assessment project.

To register your interest and find out more about these courses please contact the Property & Casualty team:

London: 0207 743 6800 / Manchester: 0161 242 4410

A one-day Managing Safely Refresher course is available to delegates who have already completed the full Managing Safely course.
